

# REPORT DOCUMENTATION PAGE

Form Approved  
OMB No. 0704-0188

Prior reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Priorities Reduction Project (0704-0188), Washington, DC 20503.

13. ABSTRACT (Maximum 200 words)			
Work performed under the above contract is described. Data collected on the SIMI project was analyzed, distributed and a data report written. Software developed was enhanced and used on other ONR sponsored projects. Planning work was accomplished for other ONR funded projects. Further development work was done on the LDEO developed RPV.

**End of Project Summary**

**Principal Investigators:** Dr. Kenneth Hunkins, J.L. Arda Jr., S.H. O'Hara

**Project Title:** Arctic Logistics and Software

**Institution:** Lamont Doherty Earth Observatory of Columbia University

**Address:**

61 Route 9W  
Palisades, New York 10964

**Telephone/Fax/E-Mail:**

Telephone - 914 365-8381  
Fax - 914 359-6940  
E-Mail - hunkins@ldeo.columbia.edu  
jay@ldeo.columbia.edu  
sohara@ldeo.columbia.edu

**Grant Number:** N00014-94-1-0496

**Grant Start and End Dates:** 03/01/1994 - 02/28/1997

**Goals and Objectives:** Hydrographic data collected during the SIMI project was post processed. The data report generated was distributed to interested scientists and presented in a poster session at the Workshop on SIMI and Arctic Modeling held in Anchorage, AK April 1995. Digital data was also distributed.

Programs developed under the previous contract were expanded to include more features and used by other institutions for data reduction of SIMI data. In addition, these enhanced programs were used on ONR funded research activities by other Lamont scientists. Software development and guidance was provided to other SIMI scientists.

Further development was accomplished on the low-cost RPV developed for the SIMI project, with additional test flights and more training of operators. Several configurations of instruments were carried and photographic operation tested successfully.

Planning work was done for both SHEBA and SCICEX programs. One investigator (Arda) participated in both projects

**Approach:**

The above objectives were completed with the supervision of J. Arda and S. O'Hara. Some of the equipment developed during the funding period were:

- Further development of the UNIX based data logging system. Enhancements added were additional navigation functions and easier support of serial devices. During this period the system was changed to SOLARIS for future compatibility.
- Maintenance of database of ONR Arctic equipment located at LDEO
- Continued support of ONR equipment returned from SIMI and SCICEX
